Robbins Schug's biocultural synthesis provides us with a new way of looking at the adaptive, social, and cultural transformations that took place in this region during the first and second millennia B.C. Her work clearly and compellingly ushers the climate change paradigm, demonstrating the complexity of human-environmental transformations. This original and significant contribution to bioarchaeological research and methodology enriches our understanding of both global climate change and Bioarchaeology and Climate Change: A View from South Asian ...

Acute shifts in climate have the potential to impact both the natural environment and local populations living amidst such change (Robbins Schug, 2011; Stojanowski & Knudson, 2014). Subsequently
