Linguistic Variables by Hans-Heinrich Lieb (ebook)
This book for the first time reconstructs in a single theoretical framework the more important approaches to linguistic variation found in areas as different as historical linguistics, dialectology, sociolinguistics, psycholinguistics, stylistics, contrastive linguistics, language typology, so-called evaluation grammar, and current Chomskyan generative grammar (generally with an emphasis on syntax). The book concentrates on language-internal variation but also analyses typological research

Chapter 5. Describing linguistic objects in a realist way

...

The view of grammars is non-reductionist; concepts of theory integration are characterized that allow us to integrate grammars with linguistic and non-linguistic theories. The conception of linguistics itself is non-reductionist, too, through applying a concept of inter-discipline that relates linguistics to other disciplines.
